DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 8 of the remarks, filed 11/12/2004, with respect to USP 5,370,865 to Yamagishi have been fully considered and are persuasive. The rejection of claims 1, 4 and 7-17 has been withdrawn.

The indicated allowability of claim 5 is withdrawn in view of the newly applied reference(s) to USP 6,436,716. Rejections based on the newly cited reference(s) follow.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 4 & 6-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, 4, 7-18 of U.S. Patent No. 6,436,716 ('716 patent). Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are broader than those of the '716 patent. If the application claim is broader or more generic than the patent claim, the application claim is

anticipated by the patent claim. *In re Goodman*. Here, the claim requires a composition comprising a diamino carboxylic acid, water-soluble polymer and carrier comprising water. This is broad enough to embrace the addition of a protein and a color indicator, such as required by the '716 patent. Thus, an obviousness type double patenting rejection is proper.
